Summary

Hello, my name is Serhii and I really want to become a backend developer. Now I don't have any experience in real work projects, but I want to get it, in my future place of work, if it is necessary to learn new technologies, I am open and only happy about it.

All my own simple projects you can see here on my github
- <https://github.com/serhio-sys>

I am basically know C#, Java, Python, JavaScript.
I can dockerize projects.
My main specialization is Python, Django, Django Rest Framework, Channels.
I am currently learning how to write server side using C# ASP.NET.
In the frontend, I also have a little experience with ReactJS, VueJS, TypeScript.
